

## **North Cary Water Reclamation Facility Expansion to 12 MGD**

**Description:** Expansion of average daily flow capacity from 10 million gallons a day to 12 million gallons a day

**Details:** New biological reactor tank, secondary clarifier, ultraviolet disinfection and related piping and electrical power facilities. Piping and flow distribution structures will improve plant hydraulic performance. This project supports continued treatment of water that is reclaimed for irrigation. Project is required for additional treatment capacity and to improve hydraulic performance.

**Schedule:** Construction begins Summer 2003 / Construction completed Fall 2005
